

## PHP Coding PRACTICE QUIZZ [1B]

1. Write a PHP script to read the contents of a text file named `data.txt` and display each line with line numbers.
2. Write a PHP script to append a new line of text "New Entry" to a file named `log.txt`.
3. Write a PHP script to search for a specific word "example" in a text file named `notes.txt` and display the line number(s) where the word is found.
4. Write a PHP script to delete all the contents of a text file named `clear.txt`.
5. Write a PHP script to read a text file named `items.txt` and create an associative array where each line in the file represents a key-value pair separated by a comma. Display the array.
6. Write a PHP script to connect to a MySQL database and display all records from a table named `employee`.
7. Write a PHP script to add a new record to the `employee` table with the following details: staffnumber=12345, idnumber=67890, surname='Smith', firstnames='John Doe', dept='HR', position='Manager', date created='2024-01-01'.
8. Write a PHP script to update the `position` of an employee with `id`=1 to 'Senior Manager' in the `employee` table.
9. Write a PHP script to delete an employee with `id`=2 from the `employee` table.
10. Write a PHP script to search for employees in the `employee` table whose `surname` is 'Doe' and display their details.
11. Write a PHP script to count the number of employees in the `employee` table.
12. Write a PHP script to retrieve and display the details of the employee with the highest `staffnumber` from the `employee` table.
